

WOOD

At Renner Italia we create solutions to design and protect surfaces.

Our coatings are technologically and aesthetically advanced. The care with which we serve those who use our coatings is our hallmark.

In the wood industry, in just two decades, Renner name has become synonymous with reliability, speed, tailor-made.

In a word: efficiency.

Renner Group around the world

Renner Italia is the beating heart of Renner Global Alliance network, a worldwide network capable of responding to every market demand. Ten nations host the production and distribution facilities of Renner Global Alliance.

Renner brand

Designed in 1958 in Brazil, the fearless white thoroughbred of Renner logo crossed the ocean in 2004 and became the symbol of Renner Italia.

It was designed by the artist and advertiser Nelson Boeira Faedrich (Porto Alegre, 1912 - 1994). Renner Herrmann Group entrusted Faedrich with the creation of a brand that enclosed the fundamental traits of the coatings industry.

The values of freedom, efficiency and courage, first and foremost. Speed, an accessory character to Renner values, was after all already inherent in the company name itself. In fact, Renner in German means 'racer'. It is from these premises that the horse with the rebellious mane in the wind was designed, capable of galloping in the opposite direction to the western readings, precisely to emphasise its stubbornly countercultural personality.

Since 2007, the white steed has appeared in a light blue rectangle with rounded corners. Light blue to signify loyalty, creativity and preciousness. White to emphasise honesty, loyalty and purity.

The history of Renner Italia

The roots

Though Renner is just twenty years old, its story takes place in Italy during the years after the Second World War, in an atmosphere of hope. In the southern hills of Bologna there is a company that produces wood coatings. The founder is Giancarlo Cocchi, an enlightened entrepreneur who understands the golden moment of wood industry. Mid 80s, Cocchi sells his company to an English group, asking to keep one of his employees at the head of the business. The name of the new company manager is Lindo Aldrovandi, the son of a policemen former partisan and a housewife. Between 1987 and 2003, Aldrovandi reinforces an already successful industrial experience. The brand is synonymous with hi-tech coatings. Research is innovative. Activities are hectic. There is no lack of work. Sales increase from 36 billion of old Italian liras to 100 million euros. And then, the property passes from English to American owners.

In July 2003 a new period begins. New American owners do not agree with Aldrovandi's choices.

They are sure to be better than him. They argue and then Aldrovandi is fired. It is a difficult moment, full of tension and disappointment, but Aldrovandi does not give up.

The history of Renner Italia

The rebirth

In August 2003, Aldrovandi meets some old friends. On one side Giancarlo Cocchi's heirs, founder of Aldrovandi's former company, and on the other Cenacchi's family, the owners of the Brazilian company Renner Sayerlack, leader in the field of wood coatings in South America.

Aldrovandi wants to start again, to build a new business, to produce coatings again. Actually, he wants to produce the best wood coatings. To reach this aim he needs somebody who believes in him.

Renner Italia sees the light and Lindo Aldrovandi is obviously at the helm of the new company.

The Italian-Brazilian ownership will invest a total of 80 million euros to support the development of the new company. Already in autumn 2003, some of Aldrovandi's old collaborators decided to resign and follow him in his new project. In Minerbio, in January 2004, the first Renner Italia plant is inaugurated. Only five months passed after Aldrovandi's layoff. Since 2004, 70 employees of the old company have followed Aldrovandi.

Meanwhile, Renner Italia becomes one of the leaders in the field of coatings, becoming an international chemical excellence and gaining from 2021 the first place in revenues among Italian wood coatings manufacturers.

Marcelo Cenacchi, Alexandre Cenacchi and Lindo Aldrovandi

SB SITE

Built up in just six months, from June to December 2006, this site is near to the modern logistics structure. The warehouse, inaugurated in 2015, can store 5.000.000 kg of coatings and accomodate 10.000 pallets places.

WB SITE

Renner Italia started here in 2004. Over time, the site dedicated to water-based coatings has expanded. The latest investment concerned a 5.000 sqm packaging plant located inside a 46.000 sqm area.

Renner Wood Coatings range

Renner Wood Coatings products are advanced solutions to design and protect wooden surfaces.

These coatings are water-based, solvent-based of acrylic, PU, NC, PE, bio-based, UV curing, or epoxy nature.

They can be applied by spray, roller, curtain coater, dipping, inert and brush.

They can be dried by the following technologies: infrared, UV, led, excimers, thermosetting, laminar air flow, compressed air.

Research

76 researchers work inside Renner Italia laboratory:

As a result, one in six employees is a chemist.

Our chemists work along with customers from furniture and door and window industries and aim at formulating coatings that go beyond market expectations. That's why 5 new products are formulated every day. The company boasts a heritage of 6,000 formulas. Many are certified formaldehyde-free and are contained inside packagings that reduce hazardous waste.

All coatings are eco-friendly and do not contain heavy metals. Without missing the guidelines set by color designers, who anticipate current trends.

Every year the company invests about 3% of its turnover in research. Renner works along with institutes such as the Universities of Bologna, Modena and Padua and the CNR.

Finally, the research project initiated with ESA is worth mentioning. In 2026, the European Space Agency will launch Flex into orbit. The satellite, which will monitor the health of vegetation on a global scale, will communicate with a finish produced in Renner Italia's own laboratories.

Low-emissions coatings

Our chemists have eliminated 95 percent of the solvent emissions of our water-based coatings for the design and durability of wooden surfaces. Our coatings are low in VOC emissions.

Renner Italia coatings are formaldehyde free. Formaldehyde may cause respiratory and eye irritation, especially in asthmatic or allergic individuals. In 2001, the World Health Organisation set 100 micrograms per metrocube (0,1 parts per million – ppm) as the maximum indoor concentration limit for formaldehyde. In Italy, this was adopted in 2008 as the maximum indoor threshold (Gazzetta Ufficiale No. 288).

In 2004, the International Agency for Research on Cancer (IARC) declared formaldehyde a carcinogen.

100% clean production

The photovoltaic field covers an area of 8,000 m² on the rooftops of our production site, generating over 2.100.000 kWh of electricity annually. This production satisfies 40-45% of the company's consumption. Thanks to this, we avoid the emission of 2,000 tons of CO₂ per year. It's equivalent to plant 115.000 trees a year. The remaining 55-60% of company consumption is supported by hydroelectric, wind, solar, biomass power. Renner Italia's green goal, in this case, is to reduce the polluting impact upstream of its actions as well.

This is why the company has obtained the G. O. (Guarantees of Origin) and the trademark "100% Energy from Renewable Sources" with which it emphasizes its commitment.

Plants ready for transition

We are convinced that the market should move decisively toward the choice of water-based coatings. Our formulas offer superior performance in chemical-mechanical resistance, but they are also greener. Renner Italia's modern facilities in Minerbio are designed for complete water-based production. At any time we are ready for complete change.

System certifications

Renner Italia is committed to maintaining its system for quality, safety and environmental management in accordance with the requirements of UNI EN ISO 9001:2015 and UNI EN ISO 14001:2015, and to gradually implement the requirements of UNI ISO 45001:2018.

The quality, safety and environment policy of Renner Italia is focused on the constant improvement of all business processes.

The aim is to provide efficient and safe performances and services, protecting the interests and corporate identity of the company and its customers. In the most complete respect for the health of workers and the environment.

AQUARIS

Water-based coatings of Renner Italia offer the most advanced technology in terms of design and performances, while respecting the environment and human health thanks to low VOC emissions.

Interior

Created to enhance and protect furniture and to make it last over time, Renner Italia water-based coatings are formulated with high strength anti-yellowing acrylic resins. Resistant to scratches, abrasions and chemical agents, they protect furniture from the wear-and-tear of everyday use. Thanks to Aesthetics program, Renner Italia supports the color selection through research and trendy inspiration.

Outdoor

Aquaris coatings for exterior keep the original beauty of doors and windows unaffected. They are covered by the exclusive Blue Shield Protection warranty of Renner Italia. Aquaris hydro-oils for exterior nourish the wood of outdoor furniture and claddings and make the maintenance operations easier thanks to the innovative self-consuming technology.

SYNTHESIS

Renner Italia solvent-based products transfer the benefits of the most modern coating technologies into the most traditional wood coating products. They are extremely easy to use and optimized for both industrial and the handcrafted use.

A wide range of possible applications for Renner Italia solvent-based coatings: on open or closed pore wood, as glossy and matt, pigmented or clear coatings. Synthetic, nitro, polyurethane and polyester coatings. Dyes for generic and specific use. Additives, integrative and auxiliary products. PU, PE, NC and synthetic thinners.

Whatever object you need to coat or color to reproduce, Renner Italia solvent-based products are synonymous with highest standards.

Even Synthesis products contain raw materials of the highest quality and completely harmless to the human health and environment. Amongst the components there are no traces of heavy metals like lead, cadmium, antimony, barium, mercury, chromium.

HYBRID PRO

Hybrid Pro is the range of coatings for exterior providing all the advantages of water-based and solvent-based technologies.

All the advantages in one formula and boosted performances outdoors: stop fiber swelling, fast drying, low emissions.

The main strengths of Hybrid Pro are represented by

- the excellent adhesion to the wooden substrate, even in condition of very high humidity. A strong adhesion, a solid foundation for the entire coating system
- reduction of the risk of peeling near hail cracks

Combined with topcoats of Niso range, Hybrid Pro expresses cutting-edge technology in the field of exterior window and door coating.

purebiocoatings

Pure Bio Coatings range is Renner Italia engagement against climate change. Pure Bio Coatings products guarantee top features in the fields of protection, resistance, and design. Concerning performances, these products can be compared to Renner standards, but they are improved with the most advanced technologies aimed at preserving the environment.

Pure Bio Coatings range are characterized by

- raw materials from renewable sources
- raw materials non-issued from hydrocarbons
- no emissions of volatile organic compounds

Pure Bio Coatings contain raw materials, complying with the International Sustainability and Carbon Certification.

FIREWALL

RENNER ITALIA'S FIRE-RETARDANT COATINGS

Renner Italia's fire retardant coatings keep the properties of wood unaffected, ensuring (thanks in part to the tinting system) aesthetic standards of the highest level and technological contents that are fundamental for the safety of public and private spaces.

Firewall's water- and solvent-based coating systems stop the ignition of fire, delay the spread of flames, and limit the emission of toxic gases while complying with the complex international regulatory framework.

These products are certified for floors, cladding, walls, ceilings and furniture especially of highly frequented public areas and open to the public.

The expertise of our team of experts is ensured to designers and fire managers if they use Firewall coatings.

Rio Verde is Renner Italia's range of retail coatings.

Rio Verde makes available to private individuals and professionals the same quality demanded by the large furniture and window and door industry.

Distributed in thousands of retail stores, Rio Verde coatings are a concentrate of technology aimed at decorating, protecting and caring for wood and many other materials such as metal, plastic, glass, wall and fabric.

The range consists mainly of water-based formulas. Many items comply with the standard for coating toys and are certified for food contact, and are rated A+ according to French indoor emission regulations.

Solid is the range of solutions by Renner Italia for wooden floors.

The meeting of Italian design and international high technology takes place on wooden floors coated and treated with Solid products.

Every formula contains our hi-tech laboratories research.

Primers, topcoats, oils, waxes and detergents of Solid range enhance the wood, lending it a strong personality and making it extremely resistant.

The tinting system has no limits

Coating means color

Color is the physical interface of design thinking. With thousands of color solutions and special effects (textures), Color System tinting system of Renner Wood Coatings is the ideal landing place for those who want to define, renew and consolidate the identity soul of their manufacturing.

Accuracy, speed and replicability

Created to enhance, protect and make surfaces last over time, Renner Wood Coatings range is designed to satisfy all the needs of designers and applicators.

Color System tinting systems precisely replicate every shade of the color wheel in high-quality pigmented finishes. Color System tinting systems, for water- and solvent-based coatings, ensure precision, speed and ease of use; maintain high quality standards; and reduce human intervention.

The tinting laboratory

The know-how of our chemists-colorists is the foundation of Color System tinting systems. Pigmented pastes with high hiding power and compatibility along with neutral bases for tinting are formulated with high-quality raw materials. Through materials analysis, target definition and use of advanced formulation software, our colorists offer customized solutions in the desired shade.

Renner service centers

Renner service centers are widely distributed in 67 countries. Everywhere it is possible to precisely replicate any shade in the desired gloss. This is possible thanks to our converters suitable for coloring with the latest generation of universal pastes. Renner service centers are fully instrumented and well known for efficiency, flexibility and speed.

The advantages

Thanks to tinting systems supplied in our service centres, you can

- reproduce every finish accurately and standardized, in every packaging and every opacity
- get products cleanly and quickly
- ensure coatings with in-house production characteristics of Renner Italia
- comply with legal requirements

Pastes and converters

Color System tinting system reproduces finishes by the (automatic and controlled) addition of pigmented pastes into suitably formulated base vehicles. Such vehicles are commonly recognized as converters.

Renner Italia pigmented pastes are produced following precise guidelines

- Completeness of the entire color spectrum
- Color stability and durability to the most severe light exposures
- Compatibility (they are intermixable even in complex formulations, where they maintain excellent rub-out test behavior)
- Universality of use that never compromises the final result
- Ideal rheology and concentrations for use in an automated dosing system

Renner Italia converters

- are formulated for the achievement of perfect miscibility and full compatibility with pastes
- cover the spectrum of all coating systems and final applications
- allow service centers, after mixing with pastes, to obtain finishes that have identical quality and performance of a product made at Renner Italia headquarters

How the spectrophotometer works

Color System spectrophotometer breaks down the electromagnetic waves coming from an object subjected to a standardized illuminant (included in the instrument itself) and, using the interpolation program, compares them with the relative values of Renner Italia pastes and converters already recorded in the database.

At that point the spectrophotometer synthesizes the best mixture of pastes and gives as output the formula based on the combination of Renner Italia converters and pastes, allowing the service center to immediately make the read color.

The level of accuracy of the spectrophotometer is very high.

Once the color is made, the service center stores the formula in the database dedicated to the user so it can be reproduced at any time.

Efficiency at your service

TECHNICAL ASSISTANCE

Speed and expertise

Renner Industrial Coatings also stands for the best in after-sales service. Our logistics centers are valued for their efficiency and reliability, with real-time responses that can constantly support your production.

Our technicians always by your side

They listen carefully to your company's needs and production capabilities

They identify and propose solutions best suited to your goal

They follow the application process and verify that the results meet Renner's high standards and your expectations

They work as a link with the laboratory to formulate customized products

Training for specialists

A DEDICATED PROGRAM

Renner Academy

The specific course to learn more about coatings, materials and application techniques. A program dedicated to Renner partner.

Why Renner Academy

The world of coating is a highly professional and constantly evolving field. Renner Academy was established to provide industry professionals with the skills to get in step with the times.

Customized courses in Minerbio

By attending Renner Academy courses you will have access to Renner Italia application room and laboratories at the industrial site in Minerbio (Bologna). Professional equipment and the most experienced trainers will be at your disposal. The courses will be developed through modules that will enhance above all the practical part, while not forgetting the theoretical knowledge.

Courses contents

The focus will always be on your specific needs, aiming to enhance your energy. No waste of time.

During the courses, the types and properties of coating products and their application techniques will be examined according to your business and goals.

To whom Renner Academy is dedicated

Renner Academy offers its training courses mainly to:

- operators of automatic systems
- professional applicators
- colorists / tintometrists
- quality control employees

AESTHETICS

design talks

Tailor-made color selection

COLOR STUDIES

Get inspired by Renner

Aesthetics is the design thinking offered by Renner Italia to those who are looking for solutions to create, innovate and position the identity soul of their brand and of their production.

Coating lends visual identity to surfaces. Coating is the physical interface of design thinking. Coating differentiates your own manufacture.

By means of Aesthetics colour studies and special effects, Renner

- offers trend-related visual solutions
- provides finishes that enhance surfaces, without altering them
- lends the physicality of color to ideas
- inspires design thinking

Aesthetics project by Renner Italia offers one or more tailor-made moodboards for every solution proposed, suggesting new aesthetic proposals through: concepts; colour charts; combinations of surfaces enhanced by our coatings.

IDENTIKIT

Be Renner Dealer

Be Renner everywhere

YOU INSIDE OUR TEAM

Distribute our coatings

Identikit is the project with which the dealer takes part to Renner Italia network in terms of visibility, recognisability and memorability. The tools, offered by Identikit, are custom-made created according to dealer's needs, considering also the corporate identity, that characterises Renner Italia team all around the world.

Around

Promotion and positioning of dealer's trademark (logo, mini website, clothes, business card, color charts, sample cases).

In

Communication and exposition inside the store (flags, roll-ups, showroom planning).

Out

Communication outside the store (moodboards & inspiration, catalogues, flyers, wrapping of work vehicles, expo booths, plaques, signs, flags).

Thanks to Identikit, Renner Italia stands shoulder to shoulder with the dealer in daily activities, such as

- positioning of the company
- building customers loyalty
- research and development of new potential customers

Renner Experience

VISIT THE INDUSTRIAL SITE

We wait for you in Minerbio

Accessing the laboratories, showroom and production site in Minerbio (Bologna) is not a simple visit.

We want agents, customers and influencers to come and experience Renner to fully feel its values, identity and sense of belonging.

- Training
- Consulting
- Inspiration

*A true experience within
an experience.*

5S model inside our plants

Since 2014 in Renner Italia, coordinated by Toyota Academy, we adopt the 5S model to maintain workplaces established on safety and efficiency. Every day at our industrial site in Minerbio, a 5S-team made up of 8 people works exclusively to maintain order and cleaning.

Our commitment to achieve the highest levels of:

SAFETY

To improve safety level and reduce the risk of injury

BEAUTY

To create a comfortable and happy working environment

EFFICIENCY

The method allows you to be more precise, reduce time and optimize space

ECOLOGY

We save resources and limit waste

EXCELLENCE

The best products are created in an organized factory

R5S

Social responsibility

Renner Italia adopts organisational productive and communicative models that support employees and reference communities and territories.

The company - the vision states - is functional in building systems of eco-sustainability and widespread happiness.

In the town of Minerbio alone, Renner has invested 364,500 euros in solidarity, sports, culture and care.

Between 2015 and 2017, through the La Buona Vernice project, Renner contributed (with 105,000 euros) to the opening of soup kitchens and craft workshops for disadvantaged youth, supported children's book festivals and supported street-art interventions, encouraged young theater companies, and distributed defibrillators.

Since 2018, Renner has focused on the Premio per il Contemporaneo to support illustrators U40.

A point of reference for many other social responsibility activities, the Minerbio-based company collaborates steadily with cultural production centers and nonprofit associations.
